

# CSS Project

Project should be done using the mobile first approach, where first you do the mobile version (of a section or the whole page), and then you adapt that layout for tablet and desktop.

**Mobile layout** - <https://goo.gl/LGAC6J>

**Tablet layout** - <https://goo.gl/EztCCm>

**Desktop layout** - <https://goo.gl/iBYCcG>

**Assets (images and fonts)** - <https://goo.gl/v28VR1>

## **Breakpoints:**

- Mobile
- Tablet - 768px
- Desktop - 1200px
